Ski-Doo Unveils New, Improved Features and Technologies to Make the Most Out of Winter

The 2027 Deep Snow Family of Ski-Doo Snowmobiles.

Key Highlights for 2027 Ski-Doo Lineup:

- **Skandic and Tundra models** move to the **REV Gen5 platform** with **uMotion rear suspension** for superior comfort and capability.
- **Expedition LE** model with **best price and value** option added.
- **New Rotax 600RR E-TEC** delivers **class-leading power**, less operating costs, and smart technology.
- **Deep Snow models** deliver lighter weight again and spread innovative features.
- **Freeride** gets **wilder and lighter** for extreme riders and adds the **first** lightweight OEM 147 x 15 x 3-inch track with a 3.5 -inch pitch.
- **X-RS Package** celebrates its **20th anniversary**.

Valcourt, Quebec, February 17, 2026 – Ski-Doo, iconic brand of BRP Inc. (TSX/NASDAQ: DOO), proudly introduces its **Model Year 2027 snowmobiles**, designed to elevate every winter adventure. The new lineup features **completely redesigned Skandic and Tundra models**, a new **Rotax 600RR E-TEC** engine with class-leading power, a wilder Freeride with the mullet attitude of business in front and party out back,

and **deep snow sleds** that continue to get **lighter** and more **precise**. Topping it off are **X-RS 20th anniversary** models that celebrate Ski-Doo's race track to production snowmobile heritage and the Expedition line that offers a huge value proposition.

Skandic and Tundra Models: Next-Level Comfort and Versatility

Already the clear leader in the Utility segment with strong, reliable performance day in and day out, the **2027 Ski-Doo Skandic** and **Tundra** raise the bar further:

- Built on the **REV Gen5 platform** in 2027 for cutting-edge technology and modern styling, now standard on all models.
- Equipped with the **uMotion rear suspension** that incorporates the latest design concepts to deliver exceptional on- and off-trail performance and comfort.
- Enhanced versatility with the **Multi LinQ Plate** for full accessory integration and a redesigned **Cargo Box** (SE package only) for quick adaptability.
- Modern look and feel combined with unmatched capability make Skandic and Tundra the ultimate utility snowmobiles for work and play.

Expedition LE: Best Value with Premium Features

For 2027, Ski-Doo brings the Expedition model to new places with the combination of the 16-inch platform and the premium features of the LE package - and delivers it at a price that makes it more accessible than ever. That's value anyone can appreciate.

- **New 16-inch-wide track Expedition LE version** comes with heated and shielded handholds with visor plug for the passenger, driver visor plug, mirrors, HD front bumper, rear rack, upgraded shocks and more.
- **Special rich LE color scheme** lets it stand out amongst its peers.

Rotax 600RR E-TEC Engine: Class-leading Power with Smart Technology

A new engine that provides the middle horsepower 2-stroke buyer exactly what they want: more power and faster response with less operating costs - plus some extra benefits.

- **Most powerful** engine in its class with **130 horsepower**.
- Same booster injectors from 600RS E-TEC and 850 E-TEC engines for 20% faster throttle response and **instantaneous acceleration**.
- Oil consumption is reduced by 20%. Riders can be confident of long engine life when using the new XPS E-TEC MAX formula oil.
- Industry-first **Sport and Eco** modes on a 2-stroke engine.
 - Eco Mode reduces fuel consumption by 5%.

- o Riders will also appreciate the Eco Mode performance as it reacts to throttle demands seamlessly for more power, then returns to Eco automatically.
- Industry-first **Silent-Stop** technology allows easy conversation or listening when engaged, and can be switched on and off as desired.

Deep Snow Models: Lighter, Stronger, More Agile

Inspired by the most extreme Ski-Doo deep snow riders, mountain fanatics will find **2027 Freeride and Summit models** pushing innovation further:

- **Up to 14 lbs (6.3 kg) weight reduction** on the **Freeride** with the first lightweight OEM 147 x 15 x 3-inch track with a 3.5 -inch pitch in 2027 - which makes the 147-inch version 18 lbs (8.2 kg) lighter over the past two years - and up to 10 lbs (4.5 kg) less on the 154 and 146 length versions in that time frame¹.
- **Freeride** with the adjustable limiter strap and bright **Ultraviolet II color** embraces a mullet attitude – business in front and party out back – that reflects the rider's boldness.
- **Summit Expert** loses another 4 lbs (1.8 kg) for a total of 12 lbs (5.4 kg) in two years as it adds the **tMotion L/O with coil over rear suspension**, forged aluminum a-arms and lighter frame components¹.
- **Summit Edge, only available in North America, aligns with Expert** characteristics and features while **Summit Adrenaline aligns with X** characteristics and features while dropping 4 (1.8 kg) and 8 lbs (3.6 kg) respectively¹.

¹ Wet weights used for these specifications, meaning the product was full of fuel, oil and coolant, the way they would be ridden.

The 20th Anniversary Editions available on the Ski-Doo MXZ, Renegade and Backcountry models.

Exclusive 20th Anniversary X-RS Packages

- **MXZ, Renegade and Backcountry X-RS packages** that celebrate racing heritage and the first X-RS that formed the most direct link of race track technology to production snowmobiles.
- **Special coloration and details** make these stand out – including Evo Bee emblems that are a throwback to one of the most intense racing times in snowmobile history.
